## Inhaltsverzeichnis

<b>1 Changelog</b>	<b>4</b>
1.1 Configuration wizard	4
1.2 iTALC	4
1.3 RADIUS	4
1.4 Univention Management Console	4
1.4.1 Computerroom module	4

# 1 Changelog

## 1.1 Configuration wizard

- The UCS@school installer now also moves existing DHCP server objects to the corresponding OU if necessary ([Bug #30435](#)).

## 1.2 iTALC

- The naming scheme of the iTALC public key file on sysvol share has been fixed. The key file name now contains the hostname of the corresponding domaincontroller slave. The old filename has been kept for backward compatibility ([Bug #30301](#)).

## 1.3 RADIUS

- During the periodic server password change the freeradius configuration now gets updated automatically ([Bug #30783](#)).

## 1.4 Univention Management Console

### 1.4.1 Computerroom module

- The stability of the UMC computerroom module has been improved. This fixes various problems with the computerroom module ([Bug #27534](#), [Bug #31036](#)).
- Fixed an error which prevents displaying of the correct room settings in computerroom module ([Bug #31193](#)).
- When setting share and printer access restrictions in the computerroom module, the configuration change now takes effect for clients that are already connected to the samba server ([Bug #31202](#)).
- Fixed a misconfiguration which prevented users from printing if printing has been explicitly allowed for another computer room ([Bug #30450](#)).
