Inhaltsverzeichnis

1	Changelog	4
1.1	Import scripts	4
1.2	Domain services	4
1.2.1	Samba4	4
1.2.2	Services for Windows	4
1.3	Proxy services	4
1.3.1	Univention Management Console modules	4
1.3.2	Computerroom administration module	4
1.3.3	Computerroom module	5
1.3.4	Wizards	5

1 Changelog

1.1 Import scripts

- In single server environments the script `create_ou` now always uses the domaincontroller master as responsible domaincontroller/fileserver for the new OU. This fixes wrongly assigned fileservers for Marktplatz shares. Existing Marktplatz shares have to be fixed manually ([Bug #32095](#)).

1.2 Domain services

1.2.1 Samba4

- During the join of a Windows computer to a school the group memberships are now checked before the computer object is created. If the user is not member of the Domain Admins group, the Windows object is not created and the client can not be joined ([Bug #32249](#)).
- The service S4 SlavePDC will now be added to all Samba 4 school DCs. The S4 connector will no longer synchronize the password for these Slave PDCs from Samba4 to OpenLDAP. This will prevent a possible synchronization loop ([Bug #32522](#)).

1.2.2 Services for Windows

- A debug message in the listener module of *ucs-school-netlogon-user-logonscripts* has been fixed ([Bug #32339](#)).

1.3 Proxy services

- The join script of the package *univention-squid-kerberos* failed on samba3 dc slaves in a samba3/samba4 mixed environment. This bug has been fixed ([Bug #32186](#)).

1.3.1 Univention Management Console modules

- Restrict the handling of file uploads to be more secure ([Bug #32176](#)).

1.3.2 Computerroom administration module

- An error within the package *python-ucs-school* has been fixed that could lead to a traceback within the computerroom administration module if the module has been opened as teacher or school admin ([Bug #32232](#)).

1.3.3 Computerroom module

- Fixed detection whether the user of a connected iTALC client is a teacher or a student. The detection had failed if previously a teacher was logged in ([Bug #32035](#)).

1.3.4 Wizards

- Fixed a bug which caused the creation of a new class although a class with same name but without OU prefix exists when creating a new user ([Bug #32337](#)).
